Return | Repair | Replacement — Consumer Policy

Perfectub by Brak Tub Corp.

At Brak Tub Corp., we take great care to ensure that every Perfectub is properly packaged and shipped in good condition. Because bathtubs are heavy, large items transported by freight carriers, it is extremely important that every shipment is inspected at the time of delivery.

Inspect Before Signing

Do not sign for the tub until it has been fully inspected, especially if the box is damaged. You may decline delivery before the driver leaves the drop-off location; the driver will take the tub back at no cost to you.

Confirm that the complete six-piece installation kit is included. It is packed in a separate box inside the bathtub carton.

If the Shipping Box Is Damaged

Photograph the damaged box from enough angles to show the full extent of the damage and ask the driver to take photos as well. Note the damage on the Delivery Acceptance or Proof of Delivery (POD), even if you accept the tub.

All Perfectubs leave our warehouse on a pallet. If your tub arrives without a pallet, record that fact on the delivery receipt.

Accept Delivery Only if the Tub Is Acceptable

Remove the bathtub completely from its box. Inspect the exterior, underside and interior for damage. If neither the tub nor its packaging is damaged, you may accept delivery and sign the delivery receipt.

If You Decline a Damaged Delivery

Make sure the driver records every reason for declining the tub on the Delivery Acceptance or POD. Photograph the damage. The driver is responsible for taking photographs and reporting the refusal reasons to the freight company.

The driver will take the bathtub back for disposal at no cost to you. If purchased through a showroom or distributor, contact your selling representative within 24 hours of declining delivery due to damage. If purchased directly from Brak Tub, email Sales@braktub.com within 24 hours.

Concealed or Minor Damage

Some freight damage is not visible until all outer wrapping has been removed. If concealed damage is discovered after delivery, stop installation and contact Brak Tub or your sales representative immediately. Report the damage within 24 hours of discovery.

If damage is minor or located where it will not be visible after installation, Brak Tub will arrange a repair. Acrylic can often be repaired quickly and cost-effectively. Under the current consumer policy, Brak Tub

pays for and schedules the repair at a location and time determined by you.

How to Request a Repair or Report Hidden Damage

If purchased through a showroom or distributor, contact the representative who sold you the bathtub. If purchased directly from Brak Tub, email Sales@braktub.com.

Why the Proof of Delivery Matters

The Proof of Delivery is important to any freight damage claim. Signing a receipt stating that the bathtub was received in good order may be treated as confirmation that no visible damage was present.

If a damaged bathtub is accepted and the delivery documentation states it was received in good condition, Brak Tub may be unable to obtain a freight claim or provide a replacement at no charge. Do not allow a delivery driver to rush the inspection process.
